Preamble for Geography
The Examinations Council of Zambia has made adjustments to the assessment of Geography at Grade 12 level so as to be in line with the revised Geography Senior Secondary School Syllabus of 2013 developed by Curriculum Development Centre (CDC) of the Ministry of General Education. The structure in this specimen paper will take effect in 2018.

Purpose
The purpose of the Geography Assessment is to measure the candidates’ understanding of physical, social, cultural, economic aspects and research skills and their impact on spatial patterns. It will also assess their appreciation of spatial challenges and possible solutions. It will also be used for certification and placement.

Assessment Objectives
The Grade 12 Geography Examination will test candidates’ performance against the following:

Knowledge with Understanding
1. Recognise planets that make up the solar system.
2. Describe the effects of rotation and revolution of the earth.
3. Describe the processes on the surface of the earth and the resulting landforms.
4. Identify elements of weather.
5. Classify vegetation.
6. Appreciate the social and economic importance of natural resources.

Applying Geographical Concepts and Skills
1. Locate places using longitudes and latitudes.
2. Calculate time, angle of elevation, gradient, bearing and relative humidity, and measure distance.
3. Interpret charts, diagrams and statistical data
4. Undertake a fieldwork project and write a report.
5. Apply map-reading skills.
6. Appreciate geomorphic movements and resulting landforms.
7. Appreciate the importance of the solar system.

Information handling and problem solving
1. Conserve various natural resources.
2. Design an environmental impact assessment of economic activities.

Test Design
The Grade 12 Geography examination will consist of three papers.

EXAMINATIONS COUNCIL OF ZAMBIA

Examination for School Certificate Ordinary Level

Geography

Paper 1

1:50 000 Survey Map is enclosed with this question paper

Additional Information:
Multiple Choice answer sheet
Soft pencil (type B or HB is recommended)

Time: 1 hour 30 minutes

Instructions to Candidates

1. Do not open this question paper until you are told to do so.
2. Ensure that your name, centre number and candidate number have been correctly written on the Answer Sheet provided.
3. There are fifty (50) questions in this paper. Answer all the questions. For each question, there are four possible answers, A, B, C and D. Choose the one you consider correct and shade your choice in clear pencil on the separate Answer Sheet.
4. Read very carefully the instructions on the answer sheet provided.

Information for candidates

1. Each correct answer will score one mark. A mark will not be deducted for a wrong answer.
2. Cell phones and calculators are not allowed in the examination room.
SECTION A: MAPWORK AND BASIC TECHNIQUES

Questions 1 to 12 are based on the 1:50 000 map extract of Savanna (Jamaica).

1 What is the feature found in grid reference 276812?
   A Coral
   B Depression
   C Pond
   D Quarry

2 What is the vertical interval of the map?
   A 10m
   B 15m
   C 20m
   D 25m

3 What is the distance of class B road from the junction in grid square 2475 to the church in Fuller’s field in grid square 2381?
   A 6 500m
   B 7 500m
   C 8 500m
   D 9 500m

4 What is the bearing of the Wakefield factory in square 3274 from the school in square 2979?
   A 24°
   B 146°
   C 214°
   D 336°

5 What is the direction of the post office in grid 2882 from shed in square 3379?
   A Northeast
   B Northwest
   C Southeast
   D Southwest

6 From the map evidence, Savanna La-Mar is generally ...
   A a flat land.
   B a high land.
   C a mountainous land.
   D an undulating land.
7. What is the main economic activity of Savanna-La-Mar?
   A. Agriculture
   B. Lumbering
   C. Mining
   D. Tourism

8. What type of vegetation is found east of Bath Pen factory?
   A. Mixed or scattered cultivation
   B. Space bush
   C. Woodlands
   D. Woodlands and space bush

9. What is the general drainage pattern for Rickatts River and its tributaries?
   A. Dendritic
   B. Trellis
   C. Radial
   D. Rectangular

10. Study the map extract below and answer the following question.

Which one of the following services is **not** provided in the extract above?
   A. Housing
   B. Postal services
   C. Tourism
   D. Transport

11. The area south of McNeill's Land has no human settlements because, it is ...
   A. a forest.
   B. a plantation.
   C. mountainous.
   D. swampy.

12. The dominant settlement pattern in Savanna-La-Mar is ...
   A. dispersed.
   B. linear.
   C. nucleated.
   D. random.
SECTION B: ELEMENTS OF PHYSICAL GEOGRAPHY

13 Which among the following closely resembles the planet Uranus?
   A Jupiter
   B Neptune
   C Pluto
   D Venus

14 When it is 3.00 pm in Greenwich, what is the local time of Sidney 151°E?
   A 01.04 a.m
   B 01.04 p.m
   C 05.04 a.m
   D 05.04 p.m

15 Study the diagram below which shows the internal structure of the earth.

Which of the following shows the correct way the layers are arranged?

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Crust</td>
<td>Inner core</td>
<td>Outer core</td>
<td>Mantle</td>
</tr>
<tr>
<td>B</td>
<td>Crust</td>
<td>Mantle</td>
<td>Outer core</td>
<td>Inner core</td>
</tr>
<tr>
<td>C</td>
<td>Mantle</td>
<td>Crust</td>
<td>Outer core</td>
<td>Inner core</td>
</tr>
<tr>
<td>D</td>
<td>Outer core</td>
<td>Inner core</td>
<td>Mantle</td>
<td>Crust</td>
</tr>
</tbody>
</table>

16 Which one of the following is an example of secondary effects of earthquakes?
   A Collapse of buildings
   B Contamination of water
   C Damage to property
   D Death of people
17 Study the diagram of a volcano shown below.

Which of the following statements is true about this volcano? It is ...
A  a composite volcano.
B  a shield volcano.
C  made up of acid lava.
D  made up of basic lava.

18 Study the diagrams below which show a process of weathering.

What is this process of weathering shown above called?
A  Exfoliation
B  Frost action
C  Repeated temperature changes
D  Repeated wetting and drying

19 Which one of the following affects all forms of mass movement?
A  Action of gravitational force.
B  Alternate wetting and drying of the soil.
C  Heating and cooling of the soil.
D  Lubrication by rain water.

20 Why are the lower courses of rivers often densely populated?
A  There are fertile soils to support farming.
B  There is plenty of fresh water for domestic use.
C  The rivers are used for navigation.
D  The rivers have plenty of fish.
21 ... is the process by which rocks and pebbles carried by a river are broken into smaller particles as they hit against each other.
A   Abrasion
B   Attrition
C   Hydraulic action
D   Solution

22 An intrusion of magma along a bedding plane is called a ...
A   batholithic.
B   dyke.
C   sill.
D   spine.

23 What is the most noticeable effect of global warming?
A   Collapse of buildings where there was permafrost below.
B   Increase in flooding in low lying coastal areas.
C   Increase in ocean temperature at and near the equator.
D   Increase in tropical cyclones along the coastal areas.

24 The main reason for using mercury in a minimum thermometer is that it ...
A   can be clearly seen.
B   contracts when heated and expands when cooled.
C   expands when heated and contracts when cooled.
D   has a high freezing point.

25 The diagram below depicts a symbol on a wind scale.

What is the description of the wind above?
A   Calm
B   Gentle breeze
C   Light air
D   Slight breeze
26 Study the diagram below which shows a pressure system.

![Pressure System Diagram]

What weather condition is associated with the pressure system shown above?

A  Cloudy
B  Dry weather
C  Heavy rainfall
D  Windy conditions

27 Regarding the greenhouse effect, the role the greenhouse gases play is to ...

A  allow more heat from the sun to enter the earth’s atmosphere.
B  generate additional heat through various chemical reactions.
C  help humid air to hold more heat within the atmosphere.
D  trap heat that is reflected from the surface of the earth.

28 Study the photograph below.

![Photograph of Tornado]

Which of the following statements is true about the tornado shown in the photograph above? It is the ...

A  largest storm on earth.
B  most common storm on earth.
C  most violent storm on earth.
D  slowest storm on earth.
Questions 29 and 30 are based on the climatic graph shown below.

29  What is the annual range of temperature for the station above?
A  3°C  
B  5°C  
C  7°C  
D  9°C  

30  What is the total rainfall of the three wettest months?
A  520mm  
B  640mm  
C  760mm  
D  850mm  

31  Which natural region has the highest variety of plant species, insects, birds and animals?
A  Equatorial rain forest  
B  Mediterranean  
C  Savanna grassland  
D  Warm temperate forest  

32  Lumbering in the hot wet equatorial region is difficult due to ...
A  multiple species of trees.  
B  trees are in pure stands.  
C  trees are tall.  
D  trees are umbrella shaped.
SECTION C: ELEMENTS OF WORLD HUMAN GEOGRAPHY

Questions 33 and 34 are based on the population pyramids shown below.

33 Which population structure A, B, C or D has the smallest proportion of young people and the largest proportion of elderly people?

34 Which population structure A, B, C or D has the lowest life expectancy?

35 What economic activities are associated with densely populated rural areas?
   A  Hunting and food gathering
   B  Intensive rice cultivation
   C  Shifting cultivation
   D  Subsistence fishing

36 The factor which is the major contributor to urbanization worldwide is ...
   A  food security.
   B  high birth rate.
   C  industrialization.
   D  migration.

37 Which one of the following is not an input on a rice farm in India?
   A  Agricultural machinery
   B  Animal dung
   C  Animal power
   D  Family labour

38 Which one of the following pairs is not associated with extensive farming?
   A  Fertilizing and spraying
   B  Ploughing and planting
   C  Shearing and milking
   D  Weeding and harvesting
39 Which of the following statements is more applicable to sheep farming than cattle ranching?
A Animals are usually fed on hay and supplementary feed.
B Animals can thrive on scanty vegetation of semi-deserts.
C Animals require fattening before they are slaughtered.
D Farms have automatic feeding towers.

40 Which of the following describes extensive farming?
A Highly mechanised
B High use of draft power
C High use of human labour
D High yield per hectarage

41 Which one of the following does not favour the growth of cocoa?
A Deep well drained soils rich in iron and potassium.
B High and evenly distributed rainfall above 1300mm.
C High relative humidity.
D Temperatures of 17°C and below throughout the year.

42 Which of the following is a cereal crop?
A Barley
B Beans
C Cassava
D Tea

43 The type of coal which produces the greatest heat per volume and is the cleanest is ...
A anthracite.
B bituminous.
C lignite.
D peat.

44 Which one of the following is not a characteristic of HEP? It ...
A can be transmitted over long distances.
B is a wasting asset.
C is easy to use.
D is renewable.
45 Which of the following may attract dam construction for power generation?
A A large river located at the equator near expanding industries with a very steep gradient.
B A river which has formed a steep sided gorge in hard rock near mineral deposits.
C A river with plenty of rapids and waterfalls and plenty of reliable water supply.
D A shallow river with a wide flood plain which is used for sugarcane growing.

46 In the refining of oil which of the following products is extracted at the highest temperature?
A Bitumen
B Diesel
C Kerosene
D Petrol

47 Study the diagram of the blast furnace below.

```
What materials are found at 1, 2, 3 and 4 areas of the blast furnace?

<table>
<thead>

48 Which of the following is the largest producer of iron and steel?
   A   Britain
   B   Germany
   C   Japan
   D   USA

49 Study the map below showing iron and steel centres of the Ural region in Russia.

What raw material is moved along the route represented by arrow 'X'?
   A   Coal
   B   Iron ore
   C   Limestone
   D   Scrap metal

50 The iron ore which is reddish and extracted from the sedimentary rock is ...
   A   Haematite.
   B   Limonite.
   C   Magnetite.
   D   Siderite.
